

# INAUGURATION OF MINIMAL ACCESS SURGERY TRAINING INSTITUTE CHENNAI SAFE CHOLECYSTECTOMY CONFERENCE

**OCTOBER**

**29<sup>th</sup>** 01:30PM TO 05:00PM

**30<sup>th</sup>** 11:30AM TO 03:30PM

# MASTI

College of MAS is happy to announce  
Inauguration of Minimal Access Surgery  
Training Institute Chennai (MASTI) at  
11:30AM on 30<sup>th</sup> October 2021

**LOGIN : [www.televsity.org](http://www.televsity.org)**

# MINIMAL ACCESS SURGERY TRAINING INSTITUTE CHENNAI

**College of MAS**, the academic wing of Association of Minimal Access Surgeons of India has built a world class training centre - **Minimal Access Surgery Training Institute (MASTI)**. This new facility at Chennai will now become the hot spot for all minimal access surgical training activities from now on. Built in a 3500 Sq Feet space, this training centre with 2 labs, one for advanced laparoscopic training and another for various simulation will give for the trainee an ideal platform to hone their skills. Laparoscopic training lab has 7 work stations of international standards including Hi-Definition Camera, Imported training modules and modular OT systems to enhance the learning experience. The simulation lab is equipped with the most modern training simulators including **Lap Mentor and Sim man** which will give a virtual hands on experience to the trainees.

The centre will be run by a team of experts led by **Dr C. Palanivelu, the founder president of AMASI**. The faculty for each training course is carefully selected after satisfying the credentials. Faculty will be of International and National repute who will add value to the training courses. The training module will have hands on experiences in labs, one to one interactions, live demonstration, video based education and interactive lectures. To facilitate all these components, the centre has a **35 Seater Smart Class room** with state of the all telecommunication facilities. The classroom is connected to all **9 Operating Rooms of GEM Hospital, Chennai and 7 OTs of GEM Hospital, Coimbatore** through dedicated fibre link. This will enable the participants to learn surgeries at the highest level of clarity including 3D & 4K quality.

To add more value to the training courses, each of them will have affiliation and association with various scientific and statutory bodies including Medical Council, Universities and societies. Post training follow up including skill enhancement, career growth and professional guidance for each trainee is also planned. MASTI will not only train surgeons and medical doctors, but also paramedical staff, OT and CSSD technicians to provide a comprehensive training to the entire team.

**Various sub speciality training courses have been meticulously planned including:**

- |                     |                            |             |
|---------------------|----------------------------|-------------|
| • Basic Laparoscopy | • Hepato Pancreato Biliary | • Urology   |
| • Hernia            | • Bariatric                | • Endoscopy |
| • Upper GI          | • GI Oncology              |             |
| • Colorectal        | • Gynaecology              |             |

***So let us join together and put forward a true Indian surgical training centre of international standards***

**Session 1 (13 : 30 - 14 : 00) - PREPARATION & PREOP**

Topic	Moderator	Panelists
1. Case selection / premorbid conditions	Jayenta Das	Ramesh Dumbre
2. Preop preparation and antibiotics		R. Mandia
3. Consent & WHO Check list		Sandeep Ray
4. Access techniques		Nikhil
5. Insufflation and pneumoperitoneum		Mayank Gupta
6. OT layout		
7. Ergonomics		
8. Energy sources		
9. Port placement and patient positioning		
10. Instrument selection – endovision system/ hand instruments		

**Session 2 (14 : 00 - 15 : 30) - STANDARD LAPAROSCOPIC CHOLECYSTECTOMY- Video Case Based**

Topic	Moderator	Panelists
1. Port placement and patient positioning	Rajesh Shrivastava	Varghese C J
2. Initial exposure, retraction of gall bladder and identification of infundibulum		Mrityunjay
3. Calot's dissection / relevance of Hepato-cystic triangle dissection		Bhanvar L Yadav
4. Critical View of Safety (CVS)		Devendra
5. Control of CA and CD		
6. Dissection from GB bed		
7. Check haemostasis and bile leak		
8. Extraction		
9. Peritoneal Toilet and drain		
10. SILS Lap Cholecystectomy		

## Session 3 (15 : 30 - 17 : 00) - LAPCHOLE IN DIFFICULT SITUATION 1 - Video Case Based

Topic	Moderator	Panelists
1. Acute cholecystitis	Roshan Shetty	Palanivelu C
2. Gangrenous cholecystitis		Laxmana Shastri
3. Perforated gallbladder with peritonitis / liver abscess		Makhan L Saha
4. Mucocele GB		Ishwar Hoshamani
5. Cirrhotic liver		Shrikanth Hiremath
6. Mirizzi's syndrome		
7. Buried/ intrahepatic GB		
8. Invisible / contracted small GB		
9. Malposition of gall bladder		
10. Stump cholecystectomy		
11. Strategy to Prevent biliary and vascular injury		
12. Subtotal Cholecystectomy		

11 : 30 TO 13 : 00  
INAUGURATION OF TRAINING CENTER

Dr Abhay Dalvi, President ASI  
Chief Guest

### GUESTS OF HONOURS

- Dr Pawaninder Lal – Executive Director NBE
- Dr K Senthil – President of Tamil Nadu Medical Council

### SPECIAL INVITEES

- G Siddesh – President elect ASI
- Sanjay kumar Jain – Hon Secretary ASI
- Raghuram – Immediate past president ASI
- CRK Prasad – Treasurer ASI
- Pradeep Rebella – President IASG
- Rajesh Bhojwani – President elect SELSI
- Gopalakrishnan – Rural Surgeons president
- Niranjana Agarwal – President ACRSI
- Kushal Mital – Secretary ACRSI
- Shantha Kumari – President FOGSI
- Madhuri Patel – Secretary FOGSI
- Sunil D. Popat – President IAGES
- Easwaramoorthy – Secretary IAGES
- Vivek Bindal – CRSA Indian Chapter

**Session 4 (13 : 00 - 14 : 00) - LAPCHOLE IN DIFFICULT SITUATION 1 - Video Case Based**

Topic	Moderator	Panelists
1. Per operative bile leak	Biswarup Bose	Dilip Gode
2. Post op bile leak		Jai Singh Shinde Soppimath
3. Per op CBD transection		Prakash Kurumbur
4. Per op bleeding		Sameer Rege
5. Post op bleeding		Kalpesh Jani
6. Bowel injuries		Ramesh Ardhanari
7. Other mishaps		

**Session 5 (14 : 00 - 15 : 00) - MISHAPS IN LAPCHOLE CHOLECYSTECTOMY  
(Evidence based review)**

Topic	Moderator	Panelists
1. Per operative bile leak	Himanshu Yadav	Suresh C Hari
2. Post op bile leak		Senthilnathan
3. Per op CBD transection		Abhimanyu Basu
4. Per op bleeding		Subhash Agrawal
5. Post op bleeding		Tamonas Chaudhari
6. Bowel injuries		
7. Other mishaps		

**Session 6 (15 : 00 - 15 : 15) - NEWER TECHNOLOGIES IN SAFE LAPCHOLE**

Topic	Moderator	Panelists
1. ICG	Parthasarathi	Roy Patankar
2. 4K / 3D Lap camera		Deborshi Sharma

**15:15 - 15:30****FINAL WRAP UP**

## MASTI COMMITTEE MEMBERS

Dr C. Palanivelu

Dr Dilip Gode

Dr Tamonas Chaudhuri

Dr Jugindra

Dr Abhimanyu basu

Dr Roshan Shetty

Dr Kalpesh Jani

Dr Deborshi Sharma

Dr Biju Pottakkat

Dr P Senthilnathan

Dr R Parthasarathi

## TRUSTEE OF COLLEGE OF MAS

Dr C. Palanivelu

Dr Ramesh Ardhanari

Dr Om Tantia

Dr Dilip Gode

Dr Suresh C Hari

Dr Tamonas Chaudhuri

Dr B S Pathania
